## WHO DEVELOPED THIS BINARY ROBOT?

This Robot was invented by my mentor, *Classic Forex Trader*. *Classic Forex Trader* is a Forex Trader residing in South Africa. Visiting his You Tube channel, following him on Instagram, and et cetera will make you discover that **Classic Forex Trader** is not just a trader, he is a PROFITABLE trader, a great mentor to have!

The bot price was around \$25 or R400 around the beginning of July 2020, unless you have bought the Fresh Sanitised Binary Bot, you would get the Tick Hunter Bot for free as they are related 😊. We have seen the bot doubling, tripling, quadrupling accounts in less than an hour on Binary, never sawn it blowing accounts and **Classic Forex Trader** ensures that it will never blow an account.

**Classic Forex Trader** also said that the Tick Hunter Bot is much better and more profiting than it old sister Fresh Sanitised Binary Bot. Their DNA or purpose or what they are born/made for is to grow accounts, not 'Blow Accounts'.

## FEATURES OF THE ROBOT

- ☞ It doubles, triples, quadruples accounts in Minutes
- ☞ It is easy to load
- ☞ It works both on Computer.
- ☞ It has a built in Recovery Loss for any losses
- ☞ It detects your account balance and place trades according to your account balance.
- ☞ Hence, you are highly advised to have a minimum of \$500 dollars on your trading account. Where will I get that amount of money? The answer is 'Fresh Sanitised Binary Bot'.
- ☞ It works for bigger accounts, it means if you are using a smaller account of \$100, it will not work.
- ☞ Analyse for you and place trades for you.
- ☞ It has an automated TP
- ☞ It will sometimes stop, take a break
- ☞ As the older sister, Fresh Sanitised Binary Bot, Tick Hunter Bot has been sanitised in such a way that it is not affected or infected by CORONAVIRUS and it is also immune to losses.😊

Ticks Profit Hunter Bot can be used very easy.

1. Go to [bot.binary.com](http://bot.binary.com) on your mobile or PC then login with existing details
2. Click on Load the bot now you can look for your Ticks Profit Hunter Bot file from your PC or MOBILE STORAGE click on it.
3. Automatically it will be loaded.
4. Then you can now run the bot.

### Advantages of Ticks Profit Hunter Bot

1. You can make a lot of money quickly but it Depends on Your Invested Amount.
2. Ticks Profit Hunter Bot is automated Bot this means you can easily run it no analysis needed than manual trading which require a lot of time.
3. Even non experienced traders can also make Money from the market with it.
4. You don't have to monitor your trades like manual trading you can run the bot while busy with other things.

### Disadvantages of Ticks Profit Hunter Bot

1. The Profit Return Per trade is LOW you earn 10% per trade, if you risk \$10 per trade you get \$1, then if you risk \$100 you get \$10
2. The bot gives you more wins than loses that is the reason why it gives small profit.
3. You can lose lot of money with it.
4. Remember the bot gives 10% profit return which means if you risk \$10 for 6 times you make \$6.
5. But here is the problem; Let's say you risk \$1000 8 times and you made profit of \$800 with the bot, what if you lose the 9<sup>th</sup> trade? This means you LOST \$1000 for getting \$100.
6. Keep in mind the LOWER the RISK the LOWER the REWARD, the HIGHER the RISK the HIGHER the REWARD.

## Ticks Profit Hunter Bot Accuracy

1. The bot is 90% accurate based on previous performances, this means that the bot can win 90 times and lose 10 times in 100 trades, and it can win 900 times and lose 100 times in 1000 trades.
2. So far the maximum number of loses are 2 in a row.

## HOW DOES THE BOT RECOVER THE LOSSES?

### *ADVANTAGES OF AUTOMATED LOSS RECOVERY*

- ✓ The Bot use Mari angle to recover the loss since the bot earn 10% profit, if you risk \$10 per trade and lose it then the bot will risk \$100 just to cover the \$10 that is has lost.
- ✓ It is safe to use Mari angle on the bot because if its 90% accurate it's not easy to lose the \$10 and lose \$100 in a row.
- ✓ But anything is possible as this is financial market you cannot predict the outcomes of future results.

## Disadvantages of Automated Loss Recovery

- What if the bot risk \$10 then lose it? then the next trade it risks \$100 to cover the \$10 then
- lose it also? because it can make 2 loses in a row so far it means it lost \$110.
- How can it recover the \$110? it means the 3rd time the bot should risk over \$1000 to recover the losses.
- This means we are putting a lot of money at risk for just small return so how can we make money from this.

## How can I make money consistently from the bot my tips for you?

### *TRADING PLAN IS NECESSARY*

Trades with limitations you need to know when you will stop the bot, don't just let it run the whole day hoping for overnight success.

### *USE HIT AND RUN METHOD.*

How it works is I have realised that the bot is 90% accurate so I take my risk for a very short of time

I do not run the bot for over 15 minutes on a small account to avoid bad market conditions.

Even when trading on Big Account I don't run the bot the whole day because of bad market conditions.

I rather risk all the invested amount for 2 minutes then after that I stop my bot and withdraw my profit in peace.

## INVEST ONLY THE MONEY YOU CAN AFFORD TO LOSE BECAUSE TRADING INVOLVES HIGH RISK.

Do not take your last money and put it in the bot hoping for overnight success.

If you see me risking R100K on the bot it means I know very well that even after losing the R100K I will still have something to invest even if I loss R100K for 2 times and fund again it means I still afford to lose again.

Wish you well with your trading...

*"I wish you a mesmerising trading experience, to advice you, try not to put your feelings, but be fit to trade, have the profits more dominant than the losses. Never trade because you want to revenge the market, but trade because you want to milk the market, because you want to profit from the market."*
